
S0 → S1
Ingest + Extract
Parse the SRS text into atomic requirement clauses, one unit per clause group
GATE 1
RSS
Weighted representational-suitability score
pass ≥ 0.60
up to 3 re-picks before fallback
S3
Generate
Produce the test suite in the chosen representation, plus a canonical JSON twin
GATE 2
SFV
Syntactic form validity: schema × representation-grammar score
pass ≥ 0.60
GATE 3
FSA + M_g
Weighted semantic adequacy plus groundedness
pass ≥ 0.50
S6
Execute + Audit
Run the suite against the real code; the judge LLM audits code-vs-test agreement
S7
Report
Aggregate suite-level and corpus-level statistics for analysis
closed-loop repair (up to 3 attempts)
